

The Multimodal Logistics Organization

Transport Anything, Anywhere, *Anytime!*

About NLC

The National Logistics Corporation (NLC) is Pakistan's premier multimodal logistics organization, cherishing a rich history of nearly five decades in delivering end-to-end solutions to its valued clients. At the core of its mission lies the facilitation of national economic growth, achieved through the efficient management of domestic and regional cargo. NLC's extensive capabilities are bolstered by a strategically located network of dry ports, logistics parks, off-dock terminal, and container terminals, established in key commercial centres and gateway towns across Pakistan. NLC operates all major border terminals and offers cross-border transportation under the TIR Convention, as well as bilateral and multilateral transit trade agreements, connecting Pakistan with more than 10 countries.

Logistics Services

NLC Logistics Services employs multiple modes of transportation to provide comprehensive logistics solutions to its wide range of customers. The elaborate infrastructure, extensive footprint and fleet of modern vehicles complemented by trained and experienced workforce accords NLC the exclusive ability to transport diverse range of cargo to over 100 destinations across Pakistan.

NLC Logistics Services comprise road, rail, sea & air freights, dry ports, logistics parks, off-dock terminal and container terminals. NLC is the only organization in the country having state-of-the-art fleet that is fully compliant with the standards of Oil & Gas Regulatory Authority (OGRA), National Highway Authority (NHA), Crude Oil Sale Agreement (COSA) and Health, Safety & Environment (HSE) in dry and liquid cargo transportation.

NLC Marine & Air Services

NLC Marine and Air Services (MAS) provides comprehensive sea and air freight solutions to its customers. NLC operates containerized Flag Vessel Service for the Gulf region, employing 1100 TEU vessels on a 10-day round trip between Karachi, Jebel Ali, and Dammam. Additionally, NLC and DP World have launched the first-ever feeder service connecting Jebel Ali Port to Karachi and beyond. MAS diverse portfolio of services includes, international freight forwarding, ship chartering, stevedoring, project cargo handling, warehousing and distribution, consolidation services, LCL export/import shipments, bonded container movement, cross-border trucking and air freight/chartering services.

Dry Ports

The dry ports being managed by NLC facilitate traders and businessmen to have greater accessibility and penetration into hinterland markets. Speedy handling of inbound and outbound cargo is ensured through latest infrastructure and modern equipment. Traders engaged in international freight shipping and regional export/import business prefer handling of their cargo at NLC dry ports due to clearance services closer to business hubs. NLC offers dry port facilities at Sost (near Khunjerab), Thokar Niaz Baig Lahore, Multimodal Transit Hub at Jia Bagga Lahore, Quetta, Hyderabad and Karachi.

Border Terminals

NLC has set up border terminals to ensure effective border management for regional trade and has provided all requisite infrastructure for government agencies to discharge their respective duties. NLC is operating border terminals at Torkham, Chaman, Ghulam Khan Kaley, Kharlachi, Taftan, Gabd and Wahga. Torkham and Chaman border terminals have been upgraded as per international standards under Integrated Transit Trade Management System (ITTMS).

NLC Express Freight Train

NLC Express Freight Train (NEFT) has enabled NLC to present itself as multimodal solutions provider thus enhancing its supply chain capacity. NLC also offers rail freight services to its clients in collaboration with Pakistan Railways, independently or as part of end-to-end logistics solutions.

Off-Dock Terminal

To reduce delays in cargo movement and enhance overall operational efficiency, NLC has constructed off-dock terminal in Sultanabad near Karachi Port. The terminal offers essential facilities for container management and storage, enabling the ports to manage large cargo volumes without the need for physical expansion. Through its specialized services like container stuffing, consolidation and temporary storage, the terminal facilitates seamless logistics management by efficiently addressing the varied needs of traders, shippers, and carriers.

Road Freight Terminal

The Road Freight Terminal at Landhi, Karachi offers an impressive array of facilities for businesses to optimize their road freight operations. Equipped with specialized amenities, the terminal aims at simplifying logistics and supply chain management. It features contemporary Fleet Management Control Room (FMCR), fully equipped base workshop, petrol station, service station, calibration plant, asphalt-paved parking areas, and firefighting system. A 400 KVA solar system has been integrated into the terminal to harness sustainable energy. The terminal has been meticulously designed to ensure full compliance with HSE regulations.

Fleet Monitoring

The Fleet Monitoring Control Room serves as the nerve centre for real-time vehicle tracking and monitoring, ensuring intimate coordination and operational efficiency. Equipped with advanced GPS technology, it provides live updates on fleet movement, route optimization, fuel consumption, and driver performance. This centralized system enhances security, minimizes delays, and enables swift decision-making, ensuring that every vehicle operates at peak efficiency while maintaining transparency and reliability in logistics operations.

Logistics Parks

NLC and DP World are constructing modern logistics parks under JV arrangement at Karachi, Lahore, and Rawalpindi. These strategically located logistics parks provide cutting-edge services, including advanced warehousing, cold storages, comprehensive transportation infrastructure, and latest technological solutions, aimed at optimizing the entire supply chain processes. By connecting business hubs with national highways, ports and airports, the logistics parks serve as major catalyst in ensuring ease of doing business.

Aviation Service

NLC Aviation Service (NAS) employs a team of highly professional pilots and crew, with thousands of hours of flying experience, delivering reliability on every mission. NAS operates both the Airbus Ecureuil helicopter and the Cessna Citation V Business Jet, which are available for charter flights. NAS offers medical evacuation and executive travel services worldwide via its business jet. Additionally, NAS provides the most economical rates for air safaris and visits to popular tourist destinations across Pakistan, including the pristine valleys of Azad Kashmir and Gilgit-Baltistan.

Our Destinations

Our Services:

- » End-to-End Solutions
- » CMR Insurance
- » Secure and Sealed Cargo
- » Customs Facilitation
- » Container Terminals, Warehousing & Storage Facilities
- » Multimodal Transportation
- » Real-Time Tracking
- » Reefer Service
- » Dedicated Help Desk

Reefer Service

NLC offers cross-border Reefer Service to regional countries. The service provides the exporters with opportunity to transport perishable goods in refrigerated containers. The transportation of such cargo under TIR system slashes the transit time and cost without compromising the quality of perishable items. Services for fresh produce, seafood, meat and frozen items, vegetables and fruits including banana, kinnow and mango are available for Central Asian Republics, China, Poland, Belarus, Turkiye, Russia and Azerbaijan.
